

# Post-GWAS evidence map for kidney stone papillary cellular context

Genetic prioritization, single-nucleus localization, candidate-gene interpretation and plaque/stone disease-context association

## Renal papillary context

## Supported inference

- ✓ Loop/TAL-associated papillary cellular context
- ✓ MAGMA module-level plaque/stone disease-context association

## Not established

- ✗ Causality
- ✗ TWAS convergence
- ✗ SMR/coloc support
- ✗ Spatial validation
- ✗ P1 single-gene disease validation
