

A parallel evidence roles

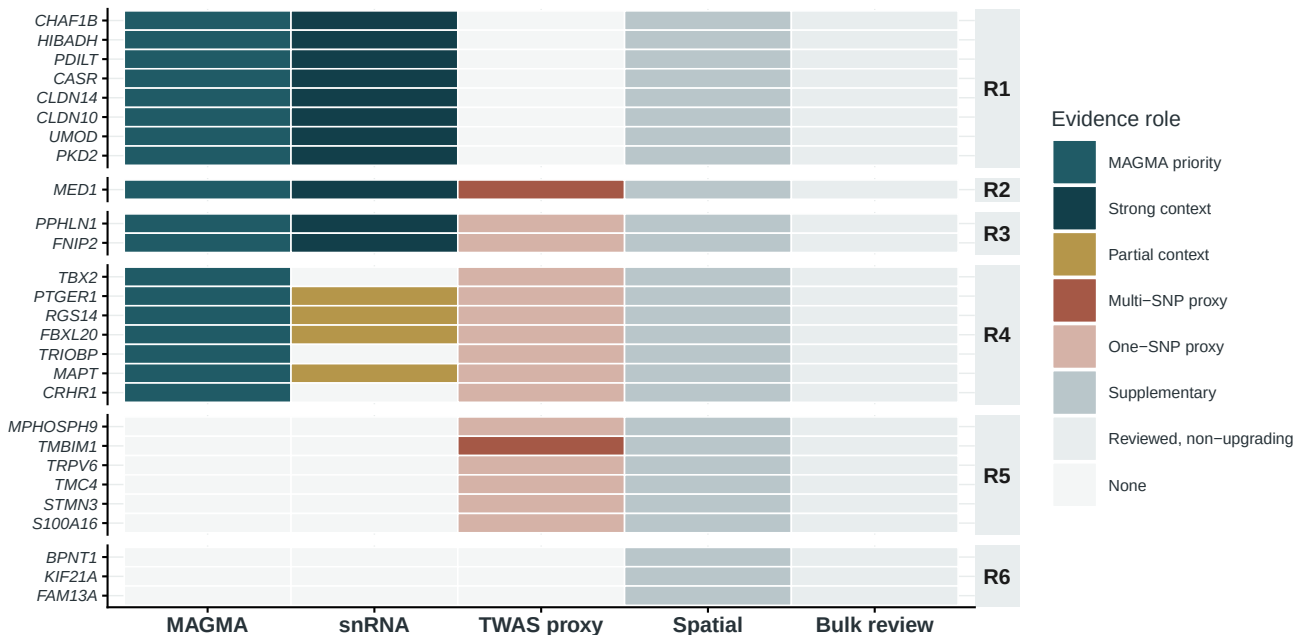

MAGMA	Genetic priority
snRNA	Cell context
TWAS	Cortex proxy
Spatial	Tissue context
Bulk	Disease-state review

C Kidney_Cortex proxy models

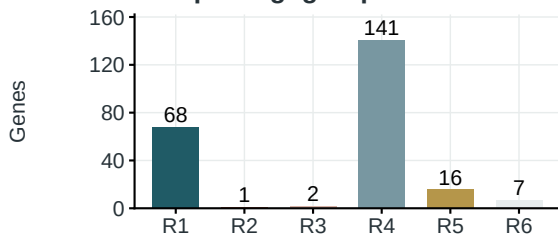

B candidate evidence matrix

Representative rows; complete 235-gene matrix in Supplementary Figure S3

D reporting-group counts

E Interpretation

Supported context-mapped genetic-priority candidates

Not inferred causal genes or papilla-specific regulation

R1-R6 are reporting groups, not causal tiers; Kidney_Cortex TWAS is proxy annotation.
