

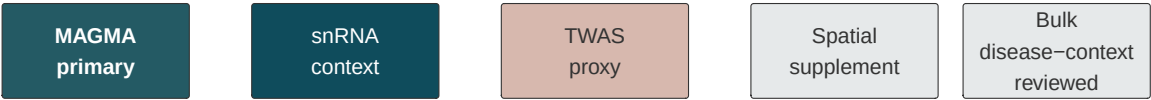

Figure 3. Conservative candidate reporting model

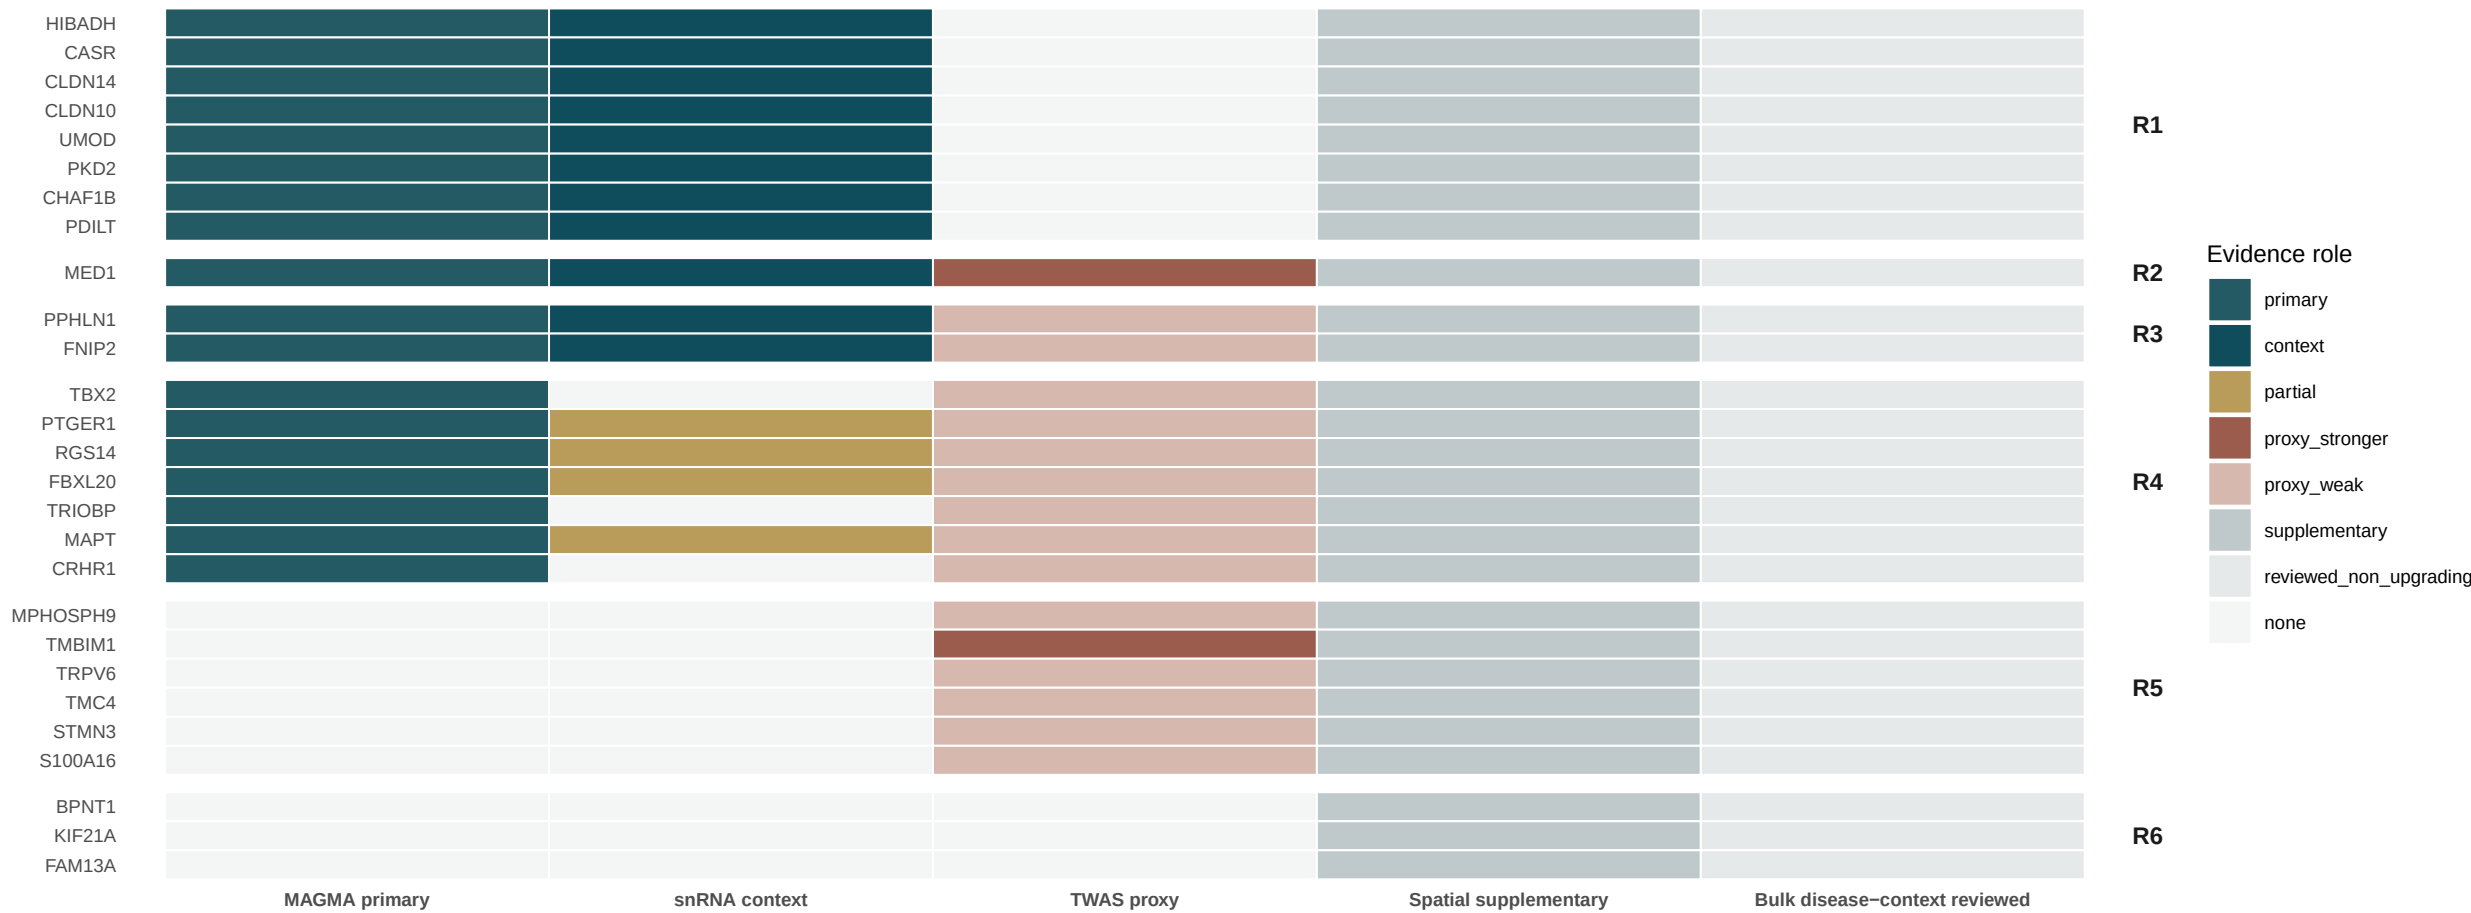

MAGMA primary; snRNA context; TWAS Kidney_Cortex proxy only; reporting groups are not causal tiers

A Parallel evidence model

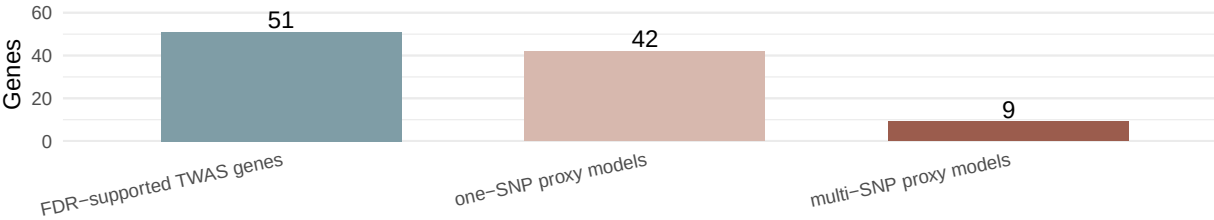

B Compact candidate evidence matrix

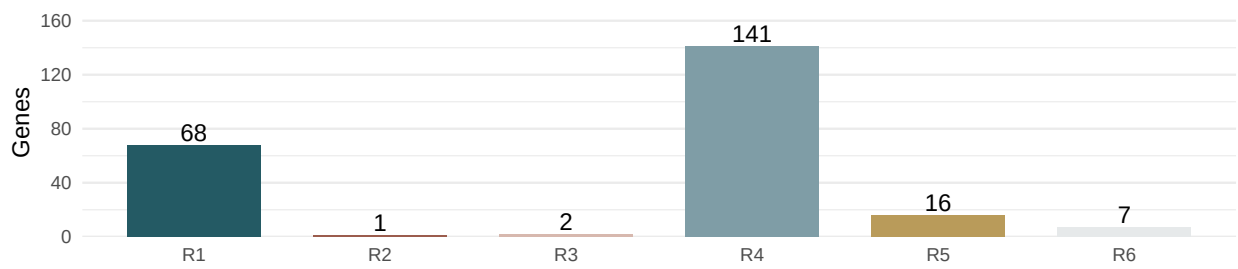

Representative rows; full matrix is in supplementary source data

C TWAS model quality: proxy only

D Reporting groups, not causal tiers

E Claim boundary

Supported: context-mapped genetic-priority candidates

Not claimed: causal genes, papilla-specific regulation, therapeutic targets, spatial validation, or claim-grade SMR/coloc
